

Elementary Board Report October 2023

We had school pictures with Best Impressions Photography and have been pleased with the process. She was very efficient during picture day, ordering was a simple process online, and she has great customer service.

We had fun celebrating homecoming week at the elementary. We enjoyed dress up days, celebrity readers, and a fun assembly with a variety of minute to win it games.

4th grade had their first field trip. They went to Nashua for Farm Safety day where they rotated through a variety of different stations to hear from different presenters.

2nd grade also had their first field trip of the year. They went to Twin Ponds, the weather started out chilly for them, but they still had a wonderful time. They learned about owls and bats, had a scavenger hunt through the nature center, took a nature hike, and made a craft. We are thankful for our partnership with Matt Crayne.

We also recognized Fire Safety Week. 1st and 2nd graders walked to the fire station, we had a fire drill, and students had the opportunity to create their own fire safety poster.

Members from the FFA came to read to elementary students for National Young Farmer Day. Members read to the first, second and third graders and also shared their knowledge of farming with students.

I've had a handful of formal observations with teachers who are on the evaluation cycle and have done a few informal walkthroughs and am excited for things happening within classrooms. Teachers are working hard to build positive relationships with students and provide students with quality instruction.
