

HS Principal's Report to the Board, 5/18/2020
Submitted by Sarah Updegraff

1. Thanks for all your support in our graduation activities the last couple of weeks. The students all were able to commence, albeit, in a different way and have a special moment with family. We hope to have something face-to-face in June if restrictions are lifted.
2. HS teachers have been using schoology and Google classroom as their formats for instruction and intend to tie up the ends on instruction this week.
3. We are excited to be doing some virtual PD on Thursday to prepare for whatever the fall may look like.
4. We are offering virtual summer school this year for all students to complete online coursework through e20/20. Darla Popken will supervise this work.
5. The 2020-21 semester 1 schedule is ready to go and student schedules are being loaded. As soon as we do the PowerSchool year rollover, we can finalize schedules and are ahead of the timeline on these things.
6. The CTE department is working diligently on completing the CLNA (Comprehensive Local Needs Assessment) before June 1. Once it is done, the AEA Perkins Consortium will approve and work through funding we can receive through Perkins. This is a change as for several years we have had to submit an Innovative Project. Monies will be assigned based on the needs discovered in the assessment.
