

Elementary Board Report February 2024

4th grade students completed their “What Bugs Me” PBL project. They had a gallery walk on Friday, February 14 for parents and community members. We had judges come in and judge the students’ presentations. They selected the top 10 inventions and 3 honorable mentions. Unfortunately, the Science and Engineering Fair was canceled for our top 10 students to participate in. We are looking at bringing in Jason Hiner from Keystone to listen to our top ten students present.

We have our preschool open house on Tuesday, February 25 in the elementary cafeteria. We already have 57 4-year-olds pre-registered and 30 3-year-olds pre-registered. Great things are happening in the preschool world!

Every 1st grader in Iowa will receive 20 decodable books this year. Our 1st graders have received their first 10 books! The 10 Just Right Reader Science of Reading decodable books were chosen specifically for them to keep! These books provide students with fun stories to practice the important reading skills they’re learning in school!

Elementary students celebrated the 100 days of school! Thanks to all of our parent volunteers who helped on this special day!
