

High School Board Report January 15, 2024

1. We have submitted a registered apprenticeship application that has been approved. Our final steps are to submit all of the required forms to the Department of Labor including our apprentice that has been hired by that business. This student will be starting work soon!
2. Finals were a success! Our students did well to end the semester. As a high school, we have had the fewest students fail a course since being the high school principal. Our ESSA team has been working on communicating our student needs with the various teacher teams to help provide the support needed to increase student success!
3. We had three students meet graduation requirements and have successfully transitioned to the workforce.
4. All of our CTSO groups have begun to prepare for spring competition. It is great to see so many students are interested in the activities provided in each of these disciplines.
5. Our Pep Band has been playing at many of our games this winter. We are now in the heart of the winter season, so please come out to support our student athletes and musicians!
6. The FAFSA portal has now opened and our senior students are working hard at filling out these documents and getting scholarships ready.
7. Mrs. O'Donnell is meeting with students to do 4 year plans and the Middle School about high school registration. In the next month, the high school will put out a course offering book and begin looking at staffing needs based on student requests.
8. Prom and graduation are coming quickly and our students are making plans to help make those events are great for our community. The New Horizon Chamber has been working with local businesses to help get banners ready for our graduating seniors!
