

High School Board Report September 20, 2021

1. Homecoming is this week. The students have come up with all of the different dress up days and worked to create a week that includes all groups. We will be having pep rallies on Tuesday, King Coronation will be on Thursday during our longer pep rally. We will have the parade on Friday at 3 pm for all students followed by the football games. Queen coronation will be at the halftime of the varsity football game. We will also recognize the Class of 1971 football team before the game. A huge thanks to the Student Senate that worked with Ms. Nelson to line up events for students
2. IBN students welcomed MFL students to the IBN space to teach them how we run our program and provide information. Our students did a great job teaching them about our philosophy and how we work with the community in real world applications.
3. Thanks to the Cheerleaders and Coach Ross for helping to make our first home football game a success. Not only did they lead our students and families, but afterward they helped to clean up the stadium. They continue to do many things to help keep our school great!
4. Our CTE team has met to look at allocations of Perkins and RPP funds to support our students. This money is used yearly to help us keep our CTE programs up to date and close to industry standards. Upon review, we will then purchase equipment. Last year we upgrade the reach in cooler for FCS, a pipe bender for IT, and other items for the Ag department.
5. We continue to use the High School Building Leadership Team, PBIS team, and the Return to Learn Committee to make decisions at the high school level.
6. It is nice to get our student section back at our games. Students had a lot of fun supporting students at football and volleyball games.
7. Working with NICC to bring in a Health Consortium to our school to allow for more students to take classes that will enter into a nursing program. We will begin that more second semester when approved by the board.
8. Mrs. Ward has been working on training Izzy to be a classroom pet for her room. We look forward to her and Izzy helping with lowering some anxiety of students in our building and helping provide a different school experience.
