Good morning,

I tried calling but couldn't reach you Jay.

Our estimated cost to do the brick relaying is \$110,000. There are several unknowns that we might find as we get tearing down the face brick, but we feel that is a good estimate.

To do the tuckpointing under where we are relaying brick and around the corner to where we left off by the loading dock we have estimated around \$120,000.

We have you on our schedule for the brick relaying project. Please let us know if you have any questions.

My cell phone is XXX-XXX-XXXX.

Thank you!

David Randall
