

Resolution Opting Out of Environmentally Preferable Cleaning Products (Green Cleaning) Pursuant to Iowa Code 8A.318(c)

Subsequent to conducting an evaluation and assessment regarding implementation of an environmentally preferable cleaning policy, and finding that the restriction of exclusively purchasing cleaning and maintenance products identified by the Department of Administrative Services or that meet nationally recognized standards would be cost-prohibitive in some cases, or unable to meet our needs, the New Hampton Community School District will not participate in the Environmentally Preferable Cleaning Mandate. However, the New Hampton Community School District will use such products when it is financially feasible and in the best interest of students and staff in the district.
