

Brad,

It was nice to visit with you earlier today.

Here is the estimated quote for transportation services for your student from the information you provided me.

The approximate weekly cost for this service would \$2065.00. It will be less initially, but as the student's time at school increases we would have the driver return to the station point in Cresco then return for the pickup in the afternoon which adds additional mileage/charges.

If we would be able to provide this service, it is important you understand this service is open to the public and if we have requests for other trips we would need to also transport to individual(s) during this time.

Thank you!
